

# Bplus HRM Check-in

## Innovation Time Recorder on Smartphone

The program is applicable for recording the employee attendance and can be substituted to the conventional finger scanning machine. This program is suitable to all kinds of business even office work, site work, outside office work, engineers, foreman, salesman, pc operators, BA, Auditor etc.

Bplus Check-in Cloud is replaceable to the finger scanning machine or conventional time attendant machine. The investment of finger scanning machine can be neglected. The 'Application Check-in' can be applied for 'Report to work' to identify the time and location that all function of attendance can be check.

- The conventional time attendance machine can be replaced by Smartphone application.
- The daily time attendance can be recorded through location and time check-in application and can be confirmed by photo display.
- The check-in point of employee can be check and record easily.
- The coordinates of location can be identified accurately.
- The attendance of each employee can be recorded and keep as evidence through Bplus Notify.
- The time attendance for difference site office is applicable.
- Both IOS and ANDROID operating system is applicable.
- The data in Cloud System can be saved securely.
- The working status can be check everywhere and every time by workers themselves through smartphone.
- The service function of HR or Personnel Department can be reduced and time availability for other management function can be increased.
