Free up working capital

Optimize Purchasing Costs
Buy the right items in the right quantities

Bplus ERP

PreparePO

Purchase Order Planning Program

PreparePO'S DATA-DRIVEN APPROACH

Turn business data into smarter purchase quantities.

FROM BUSINESS DATA TO PURCHASE RECOMMENDATIONS

- Sales over a defined period
- Current stock and safety stock levels
- Supplier details and units of measure
- Costs and minimum and maximum order quantities
- Purchasing policies, lead times, and ordering cycles

CORE CALCULATION

Product demand – current inventory

Suggested purchase quantity

PURCHASE RECOMMENDATION

Recommendations also account for purchasing conditions.

HOW PreparePO WORKS

Data-driven recommendations. Human-led decisions.

01 Sales Data
Real-time sales data captures market demand.

02 Demand Calculation
Forecasts expected sales demand.

03 Available Stock
Checks what you have on hand.

04 Purchasing Conditions
Applies lead times, MOQs, supplier requirements, and policies.

05 Suggested Quantities
Recommends what and how much to buy.

YOU DECIDE. PreparePO SUPPORTS.

Review and adjust the recommendations using your expertise, then release the purchase order with confidence.

BENEFITS FOR EVERY ROLE

Owners & Executives
- Align purchasing with sales
- Reduce dependence on single individuals

Purchasing Teams
- Save time preparing and calculating orders

Sales Teams
- Improve product availability and sales opportunities

Finance Teams
- Reduce cash tied up in excess inventory
